LOUISVILLE, KENTUCKY

MANUFACTURERS OF

PAINTS AND VARNISHES

"THE KIND THAT LASTS"

Owing to the unusual and unsettled conditions brought about by the European War, and the generally advancing markets, ALL QUOTATIONS HEREIN ARE SUBJECT TO CHANGE WITHOUT NOTICE. All orders received by us will be billed at the lowest ruling price for the quantity ordered the day the order is received. Our friends may rest assured that in entrusting us with their orders they may rely upon receiving the most considerate treatment.

March 1, 1915.

Terms

To merchants of approved credit, 60 days net or 2% cash in 10 days, except Plate Glass, Castor and Linseed Oil, Turpentine, Paris Green, Alcohol, Heavy Drugs and Bottles, on which terms are 30 days or 1% for cash in 10 days.

Electric Lamps and Batteries 30 days net or 2% cash in 10 days.

We do not charge for packages (except on Mirrors and Plate Glass and on Acids and Ammonia), and deliver all goods listed herein at cars or boat in Louisville free of dray age, unless otherwise stated at time of quotation.

How to Order

Please state what brand of goods wanted and order by quantity and size of package.

BUSINESS conditions, insofar as this country is concerned, have shown a continued improvement during the past month, which has expressed itself in a gradual increase in the volume of sales.

It is an undoubted fact, however, that the threatening aspect of the Foreign War, and its possible eventualities, is making every one operate with a certain degree of caution, which has a tendency to hold things back. It is to be hoped that the skies will clear in the very near future, and with the removal of any probability of the involvement of this country in the war we look for a sharp and continued improvement in trade.

LINSEED OIL

The past month has been marked by a decided easing up in oil values. Flaxseed has receded nearly 10c per bushel from the high point, and this decline has been reflected in a reduction of oil prices.

The demand for oil is possibly the smallest that has been known in this country for many years, being far below normal, which assists in keeping prices down.

As has been repeatedly stated, the Flaxseed produced last season in this country and Canada is no doubt insufficient for even this reduced demand, and if we had to depend on this supply alone there seems to be no question but what prices would be higher.

The Argentine, however, has just raised a vast crop, little of which has as yet been marketed.

The future of the oil market depends to a large extent upon the movement of the Argentine crop and the price that it will command, and the freight cost of getting it to this country, if it comes here. If a large percentage of the

Argentine crop comes to America, with a fair rate of freight, we should see lower prices in the very near future.

As to prices on linseed oil in the more distant future there is considerable uncertainty, with the probability of higher values.

It is thought that with wheat at present prices farmers will find it much more profitable to raise wheat than Flaxseed, and the prospect, therefore, is for a smaller acreage and a reduced crop of Flaxseed.

If this theory should prove to be correct, with anything like a normal business, we should see higher prices on oil in the late summer and fall.

It must be borne in mind, however, that these are most unusual times with most abnormal conditions, which are liable to upset all calculations.

INSECTICIDES.

The exploitation of improved methods in agriculture and horticulture is opening up a vast field for profits to the energetic, wide-awake merchant in the sale of Insecticides and Sprays.

The leading items in this line are Paris Green, Lime Sulphur Solution and Arsenate of Lead, which you will find quoted on pages 69 and 70 of this list.

We also carry a full line of Sprayers and Powder Guns for the application of liquid and dry insecticides.

The quality of the goods offered by us in this line is not surpassed, and our prices will always be found to be right.

It will pay you to investigate with the farming community in your section the market or these articles, and you will be astonished at the possibilities of sales.

The growers are being flooded with litera-

ture of all kinds promoting their use, and as the results are greatly increased crops and vastly improved quality, the remuneration to the grower is far beyond the expense involved.

We are prepared to mail to you and to your prospective customers circulars and pamphlets giving full directions for the use of Insecticides, and will be glad to do so on application.

Look into this question and you will be astonished at the amount of business you can get in this line at a handsome profit.

"If a man can write a better book or preach a better sermon, or make a better mouse trap than his neighbor, though his hut be in the forest, the world will make a beaten path to his door."

GOOD PAINT—ITS VALUE AND APPLICATION

It will be readily seen that the following article is really addressed to the consumer of paint, but we are printing it here in order to give the dealer and his salesmen a number of useful talking points in making sales.

Three things are essential to secure a good job of painting.

First—Good Paint.

Second—A surface in fit condition to receive paint—dry seasoned, and free from all loose, scaly paint, that should first be scraped off or removed with a steel wire brush.

Third—A practical, experienced painter who is willing to use the paint according to

directions; who will apply it sparingly, working it out well under the brush, allowing each coat to thoroughly dry before applying another.

The superiority of a high grade, standard brand of Prepared House Paint over keg lead or paddle-mixed paint is so plainly evident to every one that to choose the latter would be through a false idea of economy, or through total lack of information on the subject.

But the most serious error any paint buyer can make is in the purchase of a low grade, ready-mixed or "mail order" paint, and then to pay three or four times as much as his paint cost to a first class painter to put it on.

Low-grade paint is worthless, and no thinking person will buy it except to deceive himself. It is thin, and it generally requires double the quantity to cover a given surface than it would have of a high-grade, full-bodied paint.

Paint made of keg lead (or what is commonly known as paddle-mixed paint) is short lived and while it does not leave the surface in nearly as bad condition for repainting as low-grade ready-mixed paint does, it usually flattens in from three to four months' time, gradually disintegrating and powdering off until the paint film remaining totally lacks any protective value. This is due, in the light of modern experiments and tests, to the fact that no single pigment has been found that by itself will make a perfect paint for outside use, and also to the fact that while keg lead has and affinity for linseed oil it will not absorb and carry a sufficient amount of oil to bind it properly to the surface. Besides, lead used beyond a certain limit in paint, unquestionably has a destructive action upon the oil.

The right paint to paint right is a high-grade Prepared Paint, of known quality and reputation, backed by the recommendation of a reputable dealer.

Surface Conditions—Careful attention must be paid to the surface on which paint is to be applied. Guard against moisture in the form of dew, rain soaked weatherboarding, or in green and unseasoned lumber.

Sappy or Gummy Lumber—A pure Linseed oil paint will not stick to sappy lumber. With this to contend with it is advisable to pour off the surplus oil from the paint before stirring it and thin the remainder with turpentine, applying this as the first or priming coat, which will adhere better to sappy lumber than a full oil priming coat. Old paint that is loose, scaly, curling, or flaking off will absolutely ruin any good paint put over it unless first removed by a thorough scraping or cutting away with a steel wire brush.

Ochre is perhaps the worst possible substance that could be used for a priming coat, and never should be used. The best priming coat is the same paint that is used for the finishing coat, thinned down for priming as per directions. Ochre or other substitute materials should not be used as primers.

It is incumbent upon a dealer selling paint, for his own protection, to see that his paint is being properly used under conditions that are right, otherwise he may expect at some future period to be compelled to make unreasonable allowance and adjust claims that are entirely unjust.

In recommending a painter the dealer should satisfy himself that the man is practical, experienced, and willing to use the goods in the way they are intended to be used—not thinned or starved with turpentine or other liquids—nor flowed on heavily, without being worked out under the brush.

It is always well to ascertain that the painter has no "axe to grind" and that it is to his interest, as well as yours, to do the job the best way he knows how.

WIZARD TRIANGLE POLISH MOP

MASTIC MIXED PAINT.

"The kind that lasts."

This is unquestionably the best mixed paint made, being the result of over thirty years successful paint making. Pure lead, pure zinc oxide, and pure linseed oil. The formula appears on each can, and it is backed up by a written guarantee of absolute purity.

Put up in full U. S. Standard Measure cans.

We furnish forceful advertising matter and assist dealers with effective methods to bring trade to their store.

	Per Gallon.				
Inside and Outside White, Black and all ordinary colors	5-Gal. Bbls.	Cans.	1-Gals.	½-Gals.	¼-Gals.
Deep Blue and Chrome Yellow					
Chrome Greens and Cherry Red					
Vermilion					

Send for net prices, color cards, etc.

HOME AND FARM PREPARED PAINT.

A high-grade paint at a moderate price.

This is a paint of unquestioned merit. It possesses great durability and covering capacity. We guarantee it to wear and give satisfaction in every particular. It is a thoroughly reliable piece of goods, worthy of the support and recommendation of any dealer.

Put up in full U. S. Standard Measure cans.

	Per Gallon.				
	Bulk Bbls.	5-Gal. Cans.	1-Gal. Cans.	½-Gal. Cans.	¼-Gal. Cans.
White, Black and all ordinary colors					
Deep Blue					
Shutter Green and Chrome Yellow					
Vermilion					

Send for net prices, color cards, etc.

BANNER MIXED PAINT.

The best medium priced paint on the market. Is equal to a large majority of so-called "high grade" paints that sell at much higher prices. It possesses splendid body and wonderful wearing qualities. In the hands of a hustling dealer can be made a "winner" at a popular price. Put up in full U. S. Standard Measure cans.

Ordinary Colors.	Per Gallon. 5-Gal. Bbls.	1-Gal. Cans.	½-Gal. Cans.	¼-Gals. Gals.	
Inside and Outside White, Black and ordinary colors	-----	-----	-----	-----	------
Deep Blue, Shutter Green and Chrome Yellow	-----	-----	-----	-----	------
Vermilion	-----	-----	-----	-----	------

Write for prices, color cards, etc.

TRYME LIQUID PAINT.

To meet competition of low-priced paints, we offer the dealer in this brand a paint that will give good service at a very reasonable cost.

In paint as well as most other staples, economy lies only in using the best, and we always advise the user to pay the difference and get the better article, yet in some few localities cheap paints are demanded, hence the necessity of our putting this brand on the market.

Tryme Paints will be found better than the average graded paints. They possess good body, consistency, and covering qualities. Full measure cans.

	Per Gallon. ½-Bbls. 5-Gal. Bbls.	1-Gal. Cans.	½-Gal. Cans.	¼-Gal. Cans.	
Inside and Outside White, Black and all ordinary colors	-----	-----	-----	-----	------
Blue, Green, and Chrome Yellow	-----	-----	-----	-----	------
Vermilion	-----	-----	-----	-----	------

Write for prices, color cards, etc.

Pee Gee DOUBLE THICK SEMI-PASTE PAINT.

This paint, as the name indicates is a concentrated paint of double the consistency of ready-mixed house paint.

In order to prepare it for use, it is reduced by the addition of an equal quantity of pure linseed oil by the painter, thus one gallon of paint and one gallon of pure linseed oil stirred together will make two gallons of pure linseed oil paint ready to apply and possessing great durability and covering capacity.

That it is very economical is at once apparent, and for this reason is a great favorite with practical painters and large consumers.

Put up in full U. S. Standard Measure cans.

Special net prices and color cards on application.

Pee Gee HEVI-PAIST PAINT.

Sold by the Pound.

An extra heavy Paste Paint furnished in a variety of standard shades, insuring a uniform color throughout the job. No tinting colors are needed. These shades are already thoroughly incorporated by powerful mills at our factory.

Must be reduced with pure linseed oil as follows:
First coat, 6 gallons oil to 100 pounds Hevi-Paist.
Second coat, 5 gallons oil to 100 pounds Hevi-Paist.

Use 1 quart Pure Turpentine and 1 quart Japan Dryer to each 100 pounds, mixed.

	Price per pound. 12½-lb. tins.	25-lb tins.
White and Ordinary Tints	07	07
Shutter Green	09	09

Also furnished in barrels and 100 pound kits.

Write for special prices on ton quantities.

Pee Gee ADAMANT FLOOR PAINT.

"The kind that lasts."

Dries hard on a floor over night with a firm durable gloss.

For inside use only.

Made of the best pigments, oils, and varnish.

Will wear well and give best results.

Full measure cans, quart and smaller sizes in friction top cans, easy to open and close.

	Per Gallon.			
	Gals.	½-Gals.	Quarts.	Pints.
Oak, Yellow, Tan, Buff, Slate, Red, Drab, Brown, Border Red, and Border Green	$1 25	$1 30	$1 35	$1 45

Color cards on application.

Pee Gee PORCH PAINT.

Dries rapidly. Very durable. For exterior use only.

For use on veranda or porch floors, steps, railing, etc. Will stand rough usage.

Full measure cans, quart and smaller sizes in friction top cans.

	Per Gallon.			
	Gals.	½Gals.	Quarts.	Pints.
Dust Color, Warm Drab, Slate Gray, Gray Stone, and Green Stone	$1 45	$1 50	$1 55	$1 65

Sample cards on application.

Pee Gee
BRILLIANT RED BARN PAINT.

A live wire and business creator and sells rapidly where other barn paints of ordinary quality stand idle on the dealer's shelves.

P.-G. Barn Paint looks better and wears better on barns, sheds, mill buildings, factories, etc., than any other paint on the market at the same price.

Write for descriptive matter, prices, and our selling scheme.

1-Gal. Cans.	5-Gal. Cans.	Per Gallon. ½-Bbls.	Bbls.
$0 75	$0 70	$0 70	$0 65

Pee Gee
Semi-Paste Roof and Barn Paint.

To be thinned gallon for gallon with pure raw Linseed Oil. One gallon of semi-paste makes two gallons ready to apply.

We especially recommend this grade for roof painting, on account of its great durability. It is the best and most economical paint on the market, at a moderate cost. We recommend this grade for use on all metal surfaces.

	1-Gal. Cans.	5-Gal. Cans.	Per Gallon. ½-Bbls.	Bbls.

Send for color card.

BIG FOUR.

(Improved Method Metallic Paints.)

"The kind that lasts."

This is our best grade of Metallic Paint and is suitable for high class work. It is especially recommended for bridges, freight cars, water tanks, section houses, and other railroad work requiring a very durable paint.

It possesses wonderful covering capacity, thereby making it most economical to use. The Reds are made in both liquid and semi-paste form. The Yellow is only made in liquid form.

These paints are the highest grade metallic paints made, ground in pure linseed oil. None can be made better at any price.

Suitable for wood or metal roofs and especially adapted for factories and warehouses where nothing but first-class paint is desired.

All packages are full measure.

	Per Gallon.

ANTI-CORROSIVE BLACK ROOF PAINT.

An Elastic Black Roof Paint (Free from Acid).

Recommended for felt, paper, gravel, or metal roofs. For felt and paper roofs it is the only suitable paint, fills all cracks, stops leaks, adding years to the life of the roof.

For tin or iron roofs, smokestacks, or boiler fronts; preserves tin and metal surfaces from rust. It does not scale, crack, or peel off new work; flows freely and evenly; always insures a good job; stops all small leaks. Only one color—**BLACK.**

	Per Gal.
Barrels	$0 40
5-gallon cans or ½-barrels	45
1-gallon cans	50

Pee Gee
DREADNAUGHT BLACK.

This heavy-bodied Black is made on a base of pure mineral Gilsonite and, when dry, it possesses greater toughness and elasticity than the ordinary asphaltum paints. It is waterproof and acid proof.

Dreadnaught Black is absolutely free from rosin and from acid or alkali. It does not contain coal tar in any form and hence is easily workable at ordinary temperatures.

Bridges which are subject to extreme moisture can be effectively protected from rust. Stacks, Boiler Fronts, Condensers and similar heated surfaces will better resist temperature changes when coated thoroughly with Dreadnaught Black.

It is easily applied, works well under the brush.

	Per Gal.
Barrels	$0 90

CREO-STAIN.

A Perfect Shingle Stain and Wood Preservative.

Made in nineteen different colors with linseed oil as the fixative and creosote as a preservative, and strong pigment colors particularly adapted for their permanency and durability. The crude creosote penetrates the shingles or lumber, and by its natural preservative properties adds long life to the wood treated with Creo-Stain.

To estimate quantity required for brush work: Allow one gallon for every 100 square feet of surface for two coats.

For dipping: Use from two to three gallons per 1,000 shingles, regulation size 4x16, dipped two-thirds of length.

For dipping and finishing with one brush coat it will take about three gallons to each 1,000 shingles.

To obtain best and most durable results, two coats should be applied as on our samples.

	Per Gallon.		
	1-Gal. Cans.	5 and 10-Gal. Cans.	½-Bbls. and Bbls.
Nos. 201, 202, 203, 204, 205, 206, 207, 208	$0 50	$0 45	$0 40
Nos. 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311	70	65	60

The above numbers represent all the popular colors. Send for sample of the stains on wood, also for book, "The Home Beautifier," showing appropriate color schemes.

INDESTRUCTIBLE GRAPHITE PASTE PAINT.

(Ground in Pure Linseed Oil.)

Same Quality and Colors as Ready Mixed.

	Per Lb.
12½ and 25-lb. cans	$0 09¾
Bulk in bbls., about 500 lbs	09½

Directions for Use—To 12½ pounds of Paste Graphite, which is equal to 1 gallon, add 2½ gallons of pure boiled linseed oil and mix thoroughly. This will make 3½ gallons of paint.

Our Ready Mixed Graphite will cover on a smooth metallic surface about 700 square feet to the gallon, or nearly double the surface of any other paint.

Pee Gee

FLATKOATT

"The kind that lasts."

A perfect flat, dull, or velvet finish. For interior walls and ceilings.

Pee-Gee Flatkoatt is an oil paint, but different from ordinary paint in the following respects:

First: It dries with a soft velvet finish without gloss, having the appearance of imported ingrain paper.

Second: It can be easily cleaned without marring its surface.

Third: It contains no lead or other poisonous ingredients, and on this account is eminently suited for bed-rooms, school-rooms, hospitals, hotels, etc., where a thoroughly hygienic finish is required.

Fourth: In addition to being better than ordinary paint, it is cheaper, because it takes from one to two coats less and saves stippling—a very expensive operation. It is better than kalsomine or water paints, because they wash off, and **Pee-Gee Flatkoatt** does not. It is far more tasteful than paper and far more healthful. It does not become a receptacle for germs as does paper; on the contrary, when used on germ or vermin-infected walls, it drives them away. It is suited to all classes of buildings, hotels, office buildings, hospitals, schoolrooms, and the humblest dwelling to the most stately mansion.

We will gladly send color card and booklet showing interiors done in harmonious **Pee-Gee Flatkoatt** colors to any one interested.

	Per Gallon. 5-Gal.	1-Gal.	½-Gal.	¼-Gal.
All Colors and White---- Flatkoatt Firstcoater----	Prices on Application.			

PeeGee CHINA ENAMEL.

"The kind that lasts."

The highest grade of enamel it is possible to make for interior decorative purposes.

China Enamel White is used with perfect results by the most particular trade on the highest class works. Dries with superb permanent gloss or can be rubbed to a dead or egg-shell finish. Use one coat of Primer and finish with two coats of China White for ordinary work; for highest grade work increase number of undercoats.

Pee Gee AUTOMOBILE FINISHES

(READY FOR USE.)

After careful tests, we offer a complete finishing process for automobiles, covering every requirement for the auto painter. Altho primarily intended for garage work, this process can easily be followed by the auto owner. The materials carrying this label are strictly high grade and, properly applied, will produce a superb finish.

As a guide in estimating requirements, we find the following materials sufficient for complete refinishing of an average five-passenger car:

	Net prices, per can.
Two, 1-qt. Pee Gee Auto Primer	$0 75
One, 1-lb. Auto Putty	20
Four, 1-qt. Pee Gee Auto Rough Stuff	75
Three, 1-lb. Pee Gee Auto Color in Japan	(See below)
One, 1-qt. Pee Gee Auto Color Varnish	1 00
One, ¼-lb. Tube Striping Color (if desired)	(See page 26)
Two, 1-qt. Pee Gee Auto Rubbing Varnish	1 00
Two, 1-qt. Pee Gee Auto Wearing Body Varnish	1 25

The following Japan colors and color varnishes are most generally used:

	Japan Color per Lb.	Color Pt.	Varnish Qt.
Battleship Gray	$0 25	$0 60	$1 00
Cream	30	60	1 00
Cobalt Blue	42	60	1 00

Russian Green	30	60	1 00
Iroquois Red	36	60	1 00
Maroon	40	60	1 00
Holland Blue	35	60	1 00

Sample colors and complete process directions will be sent upon application. Address Paint Department.

Pee Gee FACTRILITE.

An Interior Mill White That Stays White.

Pee Gee Factrflite reflects light, increases the hours of daylight and thereby reduces the expense for artificial lighting. Made in both the finish and the enamel gloss white. We recommend Dull for first coat and Gloss for second coat, thus building up a solid white coat that will not turn yellow. Gloss reflects best and does not catch dirt.

	Per Gallon. Bbls.	5-gal. kits.
Gloss or Dull	$1 50	$1 55

Pee Gee PORTLANITE.

A Practical Mixed Paint or Finish for Concrete and Cement Walls and Floors.—Inside and Outside.—Thoroughly Damp-proof.

Portlanite is made in **Gloss Finish** for floors, and in **Dull Finish** for side walls. In ordering specify Gloss or Dull.

Colors.	Per Gallon. Bbls.	½-Bbls.	1-Gals.	½-Gals.	Qts.
White, Stone, Gray, Milwaukee Brick, Terra Cotta, Green, Red	$1 65	$1 70	$1 75	$1 80	$1 85

Pee Gee FERRONITE.

A Perfect Inhibitive Paint for the prevention of corrosion in iron and steel structural work; also a perfect first coating for metal roofs.

Ferronite is made from pigments entirely inactive to weather corrosion, effectively preventing rust. It dries to a firm elastic coat, acts as a resister of moisture and atmospheric gases, and positively will not chalk off.

Colors.	Per Gallon. Bbls.	½-Bbls.	1-Gal.	½-Gals.	Qts.
Green, Brown, Red, Bright Red	$1 40	$1 45	$1 50	$1 55	$1 60

Pee Gee LIG-VIT-OL.

A Powerful Wood Preservative.

For dipping or brushing telegraph poles, fence posts, railroad ties, boat bottoms, or other wood, above or below ground or water. Effectually protects against rot caused by exposure or alternate wet or dry conditions. Stains the wood a soft pleasing brown. Far superior to creosote as a preservative.

	Per Gal.
Barrels, 50 gallons	$0 50
½-barrels, 30 gallons	55
10-gallon cans	58

Pee Gee GALVANITE.

A Specially Prepared Paint for Use on Galvanized Iron.

Galvanite is intended as a first coating for galvanized iron, but can be used for finishing coat if color suits. If a different color is desired, any good white lead or lead and zinc paint can be applied over the Galvanite. It is important, however, that the Galvanite be applied immediately next to the iron.

When Galvanite is used the paint will not peel off.

Write for sample card.

	Per Gal.

BEST QUALITY COLORS.

(Ground in Pure Linseed Oil.)

This line of colors is made with the strongest and most permanent pigments.

Color, tone, and fineness being our principal objects, their superiority on these points is easily demonstrated by a careful comparison with other makes.

A test side by side with any other make will show their great superiority in tinting strength, which makes them the most economical colors to the practical painter and consumer.

Our equipment for grinding these colors is new and of the most approved types, insuring uniform results and excellence of manufacture.

Equal to any other line—surpassed by none.

COLOR VARNISHES—For the Professional Carriage Painter.

Solid Covering Color Varnishes are not a new thing with us, yet we have been striving for years to attain perfection in the manufacture of this article used so largely by the carriage builder. We place this line before you as the result of our success in overcoming the difficulties which still beset many factories in making this peculiar and popular product.

Our Color Varnishes dry over night and may be mossed, striped, and finished the next morning.

STANDARD WAGON PAINTS—In Paste Form (Ground in Oil and Japan).

Made Especially for the Wagon Manufacturer.

These colors possess perfect covering qualities and wear well when subjected to severe exposure. They are designed to be thinned with turpentine and applied over primer, then striped and finished.

Do not confuse these colors with cheap and adulterated wagon pastes which fade out in a few months.

We put up our Standard Wagon Paints in 12½ and 25-pound cans, also in 100 and 300-pound kegs.

P. D. Q. PRIMER.

(In Paste Form.)

To be thinned by the user with linseed oil, turpentine, or benzine.

White and Lead Color, barrels, per pound	$0 06

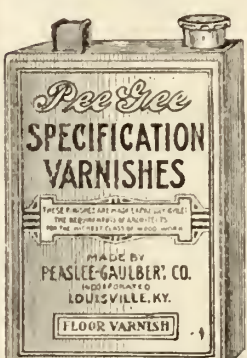
Pee Gee
SPECIFICATION VARNISHES.

This line of varnishes is fully described opposite each item below.

The line is expressly manufactured to meet the requirements of the most particular architects and artisans on the highest class of interior and exterior finishing.

As the name indicates they are designed to meet the architects' specifications, and the specifications for the use of each varnish is given on the back of each can in the form of directions.

The varnishes are put up (gallon and ½-gallon sizes) in an attractive can with the Chelco Patent Seal, which permits reclosing the can after it is partly used, thus protecting the remainder from dust and exposure.



SPECIFICATION OUTSIDE SPAR—For Exterior Use.

A superior varnish for exterior work in exposed places. We recommend this varnish for outside work on doors, vestibules, inside blinds, window casings, or any other place where an extremely durable varnish is required.

This varnish is pale in color and dries with a brilliant lustre, and can be rubbed if desired. Sets free from dust in six hours and hardens in 20 to 30 hours.

1-gallon cans, per can	$3 00
½-gallon cans, per can	1 60
Quart cans, per can	85
Pint cans, per can	45

SPECIFICATION INSIDE PRESERVATIVE—For Interior Woodwork.

An elastic inside finish for natural or grained interior wood work. Has the elasticity of a coach varnish for flowed work, hardening and leveling properties for egg-shell and rubbed work, and brightness and depth for polished work. Will stand hot or cold water and soap, and is unexcelled in durability. Will not mar white.

1-gallon cans, per can	$2 00
½-gallon cans, per can	1 10
Quart cans, per can	60
Pint cans, per can	35

SPECIFICATION CABINET VARNISH.

A high-quality but economical varnish for interior woodwork, cabinet mantels, and furniture. Is of good body, light in color, dries free from dust in 6 to 8 hours, and can be left in the gloss or rubbed to a dead finish. Has rich brilliant lustre and is very durable. Will not mar white.

1-gallon cans, per can	$1 50
½-gallon cans, per can	81
Quart cans, per can	45
Pint cans, per can	24

In 5-gallon cans, 5 cents per gallon less.

Pee Gee

SPECIFICATION VARNISHES —Continued.

SPECIFICATION FLOOR VARNISH.

For penetrating and filling the pores of wood, and producing a smooth polished surface. One coat on oil cloth or linoleum doubles its durability and preserves the coloring bright and fresh. Dries dust proof in 4 to 6 hours and can be walked on in 24 hours. Can be rubbed or left in the gloss, as perferred. Will not crack or show heel marks.

Gallon cans, per gallon	$2 00
½-gallon cans, per can	1 10
¼-gallon cans, per can	60
Pint cans, per can	35

SPECIFICATION FLAT FINISH.

Is absolutely free from wax, will resist the action of moisture, and is very durable. When used as a finishing coat over gloss varnish it dries with a dull velvety finish, which has the appearance of having been rubbed, without the labor or expense of rubbing. One coat over stain is all that is necessary to get the modern mission finish, and dries hard over night.

Gallon cans, per gallon	$2 00
½-gallon cans, per can	1 10
¼-gallon cans, per can	60
Pint cans, per can	35

SPECIFICATION LIGHT HARD OIL.

A very high-grade varnish, light in color, and when used in connection with our Light Liquid Wood Filler, is highly satisfactory for two-coat work. While it can be rubbed, it is usually left in the gloss. Dries dust proof in from 4 to 6 hours and may be rubbed in from 10 to 30 hours. It will not mar nor scratch, and is noted for its toughness and durability.

Gallon cans, per gallon	$1 20
½-gallon, per can	66
¼-gallon cans, per can	36
Pint cans, per can	21

SPECIFICATION SEAT VARNISH.

An excellent water-proof varnish for all classes of interior trim. Is intended for a high gloss finish and, if necessary, will stand rubbing, and dries hard over night.

Owing to its extraordinary hardening properties, combined with elasticity and durability, this finish is especially adapted for use on church pews, school and porch furniture, chairs, settees, etc.

1-gallon cans, per can	$1 80
½-gallon cans, per can	96
Quart cans, per can	51
Pint cans, per can	28

In 5-gallon cans, 5 cents per gallon less.

PeeGee

SPECIFICATION VARNISHES —Continued.

SPECIFICATION LIQUID SURFACER.

A high-grade varnish and pigment filler for use on new work for first coat and on close grain wood as a filler. Dries very quickly and sandpapers over night. Produces a perfectly smooth surface for the finishing coats, and where used with other varnish gives an unequaled depth of finish.

1-gallon cans, per can	$1 00
½-gallon cans, per can	55
Quart cans, per can	30
Pint cans, per can	17

SPECIFICATION PALEST DAMAR.

Made of selected Batavia Gum and recommended for use where a strictly high-grade article is required. When mixed with zinc white for making enamels it dries hard with a high gloss or can be rubbed to egg-shell finish. Works freely under brush and will never change color.

Gallon cans, per gallon	$1 80
½-gallon cans, per can	96
¼-gallon cans, per can	51
Pint cans, per can	28

In 5-gallon cans, 5 cents per gallon less.

PURE ORANGE SHELLAC.

In making this grade we use only high-grade Orange Shellac and Pure Denatured Alcohol, thus making a perfect product.

10-gallon cans, per gallon	$1 25
5-gallon cans, per gallon	1 30
Gallon glass bottles, per gallon	1 45
½-gallon glass bottles, per bottle	80
¼-gallon glass bottles, per bottle	45
Pint glass bottles, per bottle	25
½-pint glass bottles, per bottle	14
¼-pint glass bottles, per bottle	08
1¾-oz. glass bottles, per bottle	05½

Special price on barrel lots.

PURE WHITE SHELLAC.

Nothing but pure Denatured Alcohol and Bleached Shellac used in the manufacture of these goods.

10-gallon cans, per gallon	$1 50
5-gallon cans, per gallon	1 55
Gallon glass bottles, per gallon	1 70
½-gallon glass bottles, per bottle	90
¼-gallon glass bottles, per bottle	50

PREMIER FURNITURE POLISH.

In ½-pint bottles, packed in cartons of 1 dozen each.

A magnificent dressing that will completely renew and rehabilitate pianos, fine furniture, and other varnished surfaces that have become worn, scratched, or marred with age.

It is not to be compared with the numberless cheap, ineffective, and harmful mixtures that often completely ruin the surfaces applied over or remain oily and greasy to the touch.

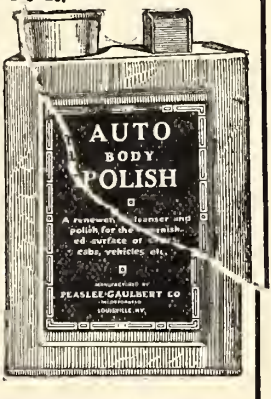
Premier Furniture Polish is guaranteed to be free from anything that will injure the finest varnishes. It cleans and polishes at one operation and leaves the surface in a brilliant gloss.

Put up in 6-ounce panel bottles in cartons of one dozen to the box.

Price per dozen---------- $1 75

AUTO BODY POLISH.

"You Ought to Use It."



For use on automobiles, carriages, buggies, etc., to brighten up and give new life and lustre to the varnish. It acts as a "tonic" and makes a vehicle look like new at a trifling cost.

Pee Gee HYDROSINE.

Weather-proof. Cold Water Paint.

Hydrosine Outside Cold Water Paint is composed of the most durable and lasting paint pigments, combined with certain cementing and waterproofing compounds, and so treated by a specially patented process that it is at once soluble and ready for use when mixed with ordinary cold water. Hydrosine is sold in the form of a dry powder; is easily mixed and applied and is guaranteed to give satisfactory results.

Hydrosine should have serious consideration, for it is a perfectly blended, smooth, fine spreading paint mixture, which possesses all the adhesive and covering properties of oil paint at only a fraction of the cost.

This is a dry paint ready for use when mixed in cold water. While not as durable as oil paints, has good lasting and protective qualities.

PREMIER WHITE.

In steel kegs, full net weight.

A combination of wearing pigments including sublimed white lead (basic lead sulphate), and zinc oxide.

This is without exception the finest, whitest, and most durable white on the market.

Superior in covering capacity and durability to S. P. White Lead used alone.

Tints made from Premier White are clear and brilliant.

Its oil-carrying capacity is immense, it taking over one gallon more oil to the hundred weight than any straight Lead on the market, making one gallon more paint to each 100 pounds.

POWDERED ARSENIC.

WHITE.

	Per Lb.
In barrels, 500-lbs	$0 06
In kegs, 100-lbs	07

ARSENATE OF LEAD.

Arsenate of Lead is a soft white paste, very easily mixed with water and when mixed stays in suspension better than most other brands.

Our Arsenate of Lead contains 15% arsenic oxide, 50% water and the balance lead oxide, with the small percentage of ½% to ¾% of soluble arsenic. This is a perfect compound.

INSECTICIDES.

LIME-SULPHUR.

Pee-Gee Lime and Sulphur Solution contains 25 per cent sulphur and 10 per cent lime, in perfect solution. Such a solution will test 32 degrees Baume and will have a specific gravity of 1.286.

Write for illustrated booklet on spraying.

50-gallon barrels, per gallon	$0 14
25-gallon ½-barrels, per gallon	19
10-gallon cans, per gallon	22
5-gallon cans, per gallon	24
1-gallon cans, per gallon	30

"NIAGARA BRAND." Soluble Sulphur Compound.

It is used for the control of San Jose scale, oyster shell bark louse, and other scale insects, apple scab, peach leaf curl, and other fungus diseases—pear psylla, leaf blister mite, and aphis.

It is put up in air-tight cans in powder form and will keep indefinitely.

It is much cheaper and more convenient to handle than the lime-sulphur solution, as 100 pounds of this material will make as much diluted spray material as a barrel of solution weighing 600 pounds.

There is no expensive package to pay for or bother to return.

It does not injure foliage when properly applied.

It sticks like paint.

It dissolves readily in cold water.

100-lb. packages, per pound	$0 07

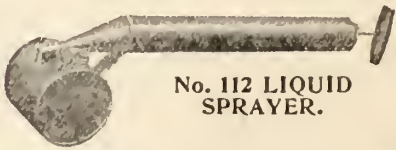
THE WAY TO KEEP THEM OFF.

PEE-GEE FLY AND GNAT CHASER

Protects horses, cattle, and live stock from flies, gnats, and mosquitoes. Will not injure the hair. Keeps the hen house free from lice and vermin. Sprayed on open drains and garbage cans it prevents breeding of flies and mosquitoes.

	Per doz.
1-gallons, 6 to case	$6 50
½-gallons, 12 to case	4 00
¼-gallons, 12 to case	2 50
Pints, 24 to case	1 50

SPRAYERS.



No. 112 LIQUID SPRAYER.

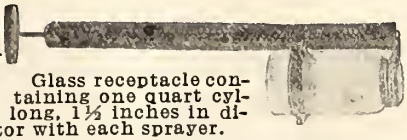
Pump cylinder measures 14½ inches in length by 1¼ inches in diamater.

This sprayer is adapted for all kinds of spraying, more especially disinfectants. The arrangements of the tube are such that it thoroughly breaks up or atomizes all oils or solutions into a fine mist-like spray which penetrates all cracks and crevices. Most excellent value.

Per dozen ---------- $3 25

SPRAYERS.

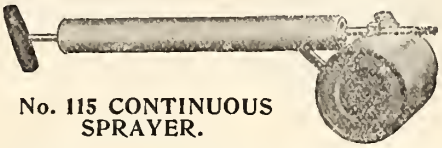
LIQUID SPRAYER



No. 101-A Glass receptacle containing one quart cylinder 20 inches long, 1½ inches in diameter. Agitator with each sprayer.

Valuable sprayer for potatoes, tobacco, small shrubs, etc. Can also be used as disinfectant in poultry houses and stables, also on cattle.

Per dozen---- ---------- $4 75



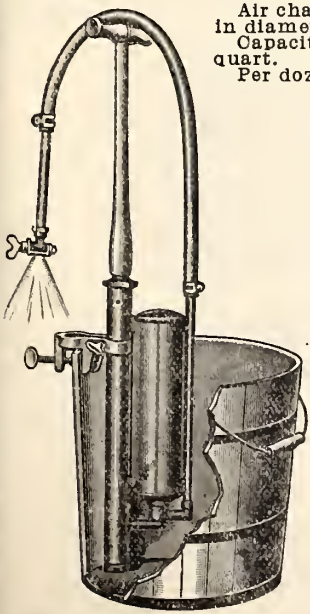
No. 115 CONTINUOUS SPRAYER.

As the name implies, is so constructed that it not only sprays on the downward stroke of plunger, but also when it is drawn back, thus causing a continuous mist-like spray.

Air chamber measures 1½ inches in diameter by 14 inches long.

Capacity of solution tank, one quart.

Per dozen---------- $5 50



No. 53 SPRAYING PUMP.

No. 53.—(See Cut.) All metal parts made entirely of brass. With nozzle which is graduated by means of a small handle to regulate the fineness of spray. Throws continuous stream 50 feet, or a steady spray for 30 seconds or more after the operator stops pumping. Fitted with malleable iron clamps, adjustable for pails of different heights. Complete without pail or bucket.

Price per dozen---$40 00

KNAPSACK SPRAYERS.

No. 22

No. 22—(See Cut.) Capacity 4 gallons. Completed with brass pump. With pressure tank, insuring a continuous spray for a minute after operator stops pumping. Complete with galvanized steel tank, four feet of hose, brass hand tube and nozzle, with churn-dash agitator.
Price, each- ------ $9 25

No. 23—KNAPSACK SPRAYERS—(See Cut No. 22.) Similar in construction to No. 22, but with brass tank; same hose equipment. Very durable, and consequently economical.
Price, each--------$12 80

No. 24—KNAPSACK SPRAYERS—(See Cut No. 22.) Similar in construction to that of No. 22, with the exception that the tank is made of copper, consequently the most durable and economical Sprayer obtainable. Same equipment as relating to hose, nozzle, etc.
Weight of these respective tanks, 18 pounds. When filled, 52 pounds.
Price, each----------$13 85

No. 1 CLIMAX SPRAYER.

Delivers a continuous spray or stream.

Detachable legs; can be mounted on a barrel.

A general utility implement for field, orchard, vineyard, or factory, consequently in demand the year round, as it can be used for applying cold water paints, whitewash, etc., as well as insecticides and fungicides.

Sold complete with 8 feet of discharge hose; suction strainer; nozzles for misting and general spraying, with 8 ft. length of spray pipe.

Packed in shipping order.

Weight, 30 lbs.
Price, each----------$10 50

NOTE.—If complete with **AUTOMATIC AGITATOR** for barrel use, $1.00 each, additional.

Utility Sprayers.

No. 13—UTILITY. With "Kant-Klog" nozzle. Complete with 2 feet of hose and nozzle. Tank 4 gallons capacity, made of galvanized steel. Weight 7 lbs. Throws continuous fine vapor spray, and is just what is wanted for grapes, potatoes, cotton, or other low-growing crops.

Price complete, each--- $4 50

No. 14—UTILITY. Similar to No. 13, but with tank made of brass. Complete with 2 feet of hose. With brass nozzle. By working the plunger for 15 seconds it will spray for 5 or 6 minutes without further pumping. Exceptional value, and as a general utility spray has no equal.

Price complete, each---------- $7 20

TRUCK AND BARREL SPRAYER.

No. 17—(See Cut.) This machine consists of our **King Pump** mounted on a barrel having a capacity of 32 gallons, together with the cart. The cart has strong iron wheels, 34 inches in diameter, and 37 inches from outside to outside of hubs, with tires 2½ inches wide; it has strong iron handles, and is a very convenient machine for use in orchards of the average size, or large gardens where it is impractical to drive a horse. The Pump has brass cylinder, plunger, and rod, also the automatic mechanical agitator, and a brush for cleaning strainer.

Price of **TRUCK and BARREL SPRAYER**, including cart and barrel and 10 feet of heavy hose, with solid brass nozzle, each----------$22 00

No. 108 ALUMINUM FINISH DUST BLOWER.

Where disinfectants in powder form are to be applied the No. 108 is just the sprayer wanted. Will not draw powder back into the pump and will not clog if the powder is sifted and kept absolutely dry.

Capacity of powder can one quart.

Opening for filling 2 inches in diameter.

Price per dozen---------- $5 50

ACME POWDER GUN.

A simple practical Implement for the extermination of Potato Bugs, and all kinds of insects, flies, etc., the pests of every house and garden.

It will handle all insecticides in their dry state—Pure Paris Green, Helibore, Persian Insect Powder, etc. It is very effective in the destruction of Potato Bugs, Currant Worms, and all like pests, and for the wholesale destruction of house flies, using freshly ground Persian Insect Powder cannot be excelled.

Price per dozen---------- $8 00

No. 110 STEEL GALVANIZED ALUMINUM FINISH.

Simple in construction. Is both automatic and positive in its action. One charge is sufficient to expel entire contents of tank. Easily washed and aired after using. Any one can operate it. Tree attachment and funnel for filling, with brass wire strainer with each machine. Strongest air pressure sprayer made. Convex heads, seamed and soldered. Capacity of tank three gallons. Easily carried, complete with shoulder strap with each machine. Length of hose and pipe, 4½ feet.

Price per dozen ----------$43 80

No. 111, same style as No. 110, but all-brass tank instead of galvanized steel, per dozen-------$56 50

The above patterns are of all styles and capacities in general demand. We, however, are prepared to furnish machines of a much larger capacity where use of a horse is necessary to transport them, and on which we shall take pleasure in furnishing illustrations and prices on application.

LEGGETT'S CHAMPION DRY POWDER GUNS.

An invaluable distributor of insecticides in the orchard, vineyard, garden, and field. It distributes without adulteration Dry Paris Green, Dry Bordeaux Mixture, Tobacco Dust, and other insecticides, evenly and with only one-tenth the labor, time, and cost required by any other device or any other method and with far greater efficiency. It will cover one or two rows at once as fast as a man walks; can be regulated easily for quantities and will do as much work in a day as a horse-power sprayer.

Champion Guns have been used extensively in potato and tobacco sections and have always given perfect satisfaction.

Extension tubes enable the gun to be used on fruit or shade trees or in the vineyard. Among potato and tobacco growers they have become almost indispensable in performing their work in an effective and rapid manner without waste of material and are far the most economical instruments ever offered for applying remedies for insects.

Price each.....$ 6 50
Price per dozen..... 74 00

LITTLE GIANT DUSTER.

This is made on the same principle as the Champion Dry Power Gun, but there are slight differences in the construction. It is offered to supply a demand for a lower priced instrument. The principle of its operation is about the same as the Champion, though there is a difference in the gearing, and while it does about the same work as the Champion Gun, for general work we would recommend the Champion instead.

GLUES.

BROWN.

Per Lb.

No. 1 Sheet, in bbls. about 140 lbs.....$0 10½

This is a bone Glue, bright amber in shade. Is just what the druggist and hardware dealer have been looking for. Comes in sheets about 4½x9 inches, weighing about 2½ ounces, retails readily at 5 cents per sheet. An A No. 1 Glue for all household purposes.

No. 2 Carpenter's, in bbls. about 400 lbs..... 13

This Glue is dark brown in color; made of a mixture of bone and hide stock. It is exactly what the name implies; a carpenter's Glue for all joint work. Absorption 1 pound of Glue to 1½ pounds of water.

No. 3 Ribbon, in bbls. about 240 lbs..... 14

This Glue comes in narrow strips 8 inches long. A bright golden color and is strictly a hide Glue. Suitable for joints.

No. 4 Cabinet, in bbls. about 340 lbs..... 15

This is high-grade flake Glue, strictly hide stock. Amber in shade, and is especially adapted for veneering, cabinet and furniture work. Absorption 1 pound of Glue to 1¾ pounds of water.

No. 5 Emory or Sand Belt, in bbls. about 350 lbs..... 15

This name indicates the purpose of this Glue, but in addition can be used for joint work. This Glue is semi-opaque, and is made entirely of hide stock. Absorption 2 pounds of water to the 1 pound of Glue.

No. 6 Carriage Maker's, in bbls. about 400 lbs..... 16

This Glue is of a bright amber shade; made entirely from hide stock and possesses sufficient strength for high-grade heavy joint work. It has a maximum absorption of 2½ pounds of moisture.

No. 7 Noodle, in bbls. about 200 lbs..... 14

This Glue is made from strictly hide stock, dark brown in color. Its principal use is for joint work, but is also adapted for sand belt or emery, as it possesses great durability.

Irish Glue, in bbls. about 125 lbs..... 17

This is the genuine imported Irish Glue; made entirely from hide stock. Its usages are many, largely for furniture and other work which requires much strength.

Schulz-Marke "Cologne," in sacks about 200 lbs..... 17

Schulz-Marke imported Glue, clear sheets, quality uniform. For all kinds of work. Absorption 2 pounds water to 1 pound glue.

"Gold Medal," in bags of 200 lbs..... 19

Imported Glue, extra clear sheets especially adapted for hardwood work, joints, etc. Quality uniform. Absorption 2 pounds water to 1 pound glue.

GLUES
—Continued.

WHITE.

Per Lb.

No. 1 White Kalsominer's, in bbls. about 200 lbs----$0 13
This Glue is made from bone stock; comes in small, thin opaque flakes and its principal use is in kalsomining, although it possesses sizing qualities.

No. 2 Extra Kalsominer's, in bbls. about 350 lbs----- 16
This is a flake, opaque white Glue; smooth finish and made from bone stock. In usage it will be suitable for light cabinet work, paper boxes, and kalsomining.

No. 3 Milliner's, in bbls. about 250 lbs---------- 19
This is also a flake, white opaque Glue; made from a mixture of bone and hide stock, and as its name indicates is largely used for milliner's purposes.

No. 4 Super Milliner's, in bbls. about 150 lbs------- 20
This Glue is similar in appearance and shape to the No. 3 Milliner's, but is made from pigs' feet. Its principal use is for high-grade milliner's work, but can also be used for kalsomining.

GROUND.

No. 1 Sizing Ground, in bbls. about 500 lbs-------- 11
This Glue is made from a mixture of hide and bone stock; dark amber shade, and is a cheap Glue for sizing, kalsomining, etc. It is also used for cheap veneering.

Extra Amber, in bbls. about 500 lbs---------- 13
This Glue is made from a mixture of bone and hide stock; a light amber sweet Glue. In addition to its usages as a size, some customers use it for veneer work, obtaining remarkable results, as it possesses great durability.

No. 10 White, in bbls. about 300 lbs---------- 15
This is opaque in appearance; is made from bone stock. This Glue is suitable for cabinet work and is considered an A No. 1 Glue for all-around work requiring ordinary strength; is well adapted for paper box work and can also be used in kalsomining.

NOTE.—Prices on glues are on original barrels. Where smaller quantities are ordered, following advances will be charged:

100-lb. lots---------- ¼c per lb.
25-lb. lots---------- ½c per lb.
Less quantity---------- 1c per lb.

GRAINING TOOLS.

RIDGELY'S FLEXIBLE GRAINER.

One Set

No.		Per Set	Each.
00	Set 5 tools as per cut	$2 50	
1	3 in. long, 1½ in. diameter, corrugated		$0 55
2	5 in. long, 1½ in. diameter, corrugated		83
3	3 in. long, 1½ in. diameter, vein		55
4	5 in. long, 1½ in. diameter, vein		83
5	5 in. long, 1½ in. diam., quartered oak		55

These tools are used with one hand; it saves 50 per cent in time, enables much better work, as you can always see what you are doing, and permits of doing work utterly impossible with other grainers.

For graining floors (now so popular) it is the only grainer that is practical.

Being flexible it accommodates itself to curved surfaces.

Any wood can be perfectly imitated and there is no limit to the variety of grains produced.

A book of instructions how to use and how to grain accompanies each set.

GRAINING COMBS.

Taylor's English Steel ..... Per set $1 00
" " " ..... Per in. 06

THE DAVIS PATENT GRAINER.

With Latest Improvements.

A set of grainers consists of three rolls, made of the best rubber, 5 inches long by 1½ inches in diameter. The corrugated roll imitates any known growth of wood. The other vein roller reproduces quater-sawed oak grain. The **Up-to-Date Grainer,** a valuable treatise on graining, with full directions for manipulating the grainers, is furnished **Free** with every set.

Price, per set---------- $1 50

PEE-GEE "RUBBERFIXT" ROOFING

Here is an opportunity no shrewd dealer can afford to turn down.

THE Heaviest, Thickest, and Most Durable Roofing Made, at prices that can't be touched where quality is considered.

Before selecting a roofing on which we would be satisfied to put our trade mark PEE-GEE, we tested all kinds as follows:

1. **Quality of felt used as basis.**
2. **Quality of asphalt used for saturation.**
3. **Quality of asphalt used for coating.**
4. **Per cent of saturation carried.**
5. **Tensile strength to the square inch.**
6. **Style and durability of finished roll.**

Our Guarantee—If properly laid and given a coat of good Black paint once every two years we guarantee:

1-ply Rubberfixt Roofing to last 5 years
2-ply " " " " 7 "
3-ply " " " " 10 "

Send us your orders.

Pee Gee Rubberfixt Roofing

FLEX-A-TILE—Red or Green.

IN ORDERING SPECIFY COLOR WANTED.

A roofing felt covered with a heavy coat of slate chips firmly imbedded, which if properly applied will last 12 years without painting, and if painted every two years thereafter, eight years additional life may be obtained.

Weight per roll 80 lbs.

Price per roll $2 50

Width 32 inches.
In 25-Roll Lots, 10c per Roll Less.
Nails and Cement in Every Roll.

Send for Samples and Booklet To-day

The GENERAL SAYS:

When you buy roofing you want some assurance that it is going to stand up under any kind of weather conditions.

Certain-teed Roofing

is recognized all over the world and recommended by the leading architects and engineers as the modern scientific method of covering all types of buildings—houses, barns, churches, farm buildings, apartment houses, factories, warehouses, school and university buildings. We use no coal tar in any of our roofings. Coal tar is a by-product of coke ovens and gas works and, being of gaseous origin, drys out too quickly. CERTAIN-TEED is made of the best roofing felt, saturated in our properly blended asphalt, and coated by a harder asphalt which keeps the soft saturation—life of the roofing—from drying out quickly.

Four Reasons for Certain-teed.

1. It is of the highest quality possible for skilled men and perfect machinery to make.
2. It has the greatest durability, and will stand the test of time in all kinds of weather—hot or cold, wet or dry.
3. It is guaranteed in writing to last 5 years for 1-ply, 10 years for 2-ply, and 15 years for 3-ply; and this guarantee is backed by the biggest company in the roofing and building paper industry.
4. It is reasonable in price because our modern manufacturing and selling methods reduce the cost of production—and hence the selling price—to a minimum.

CERTAIN-TEED Roofing is put up in rolls 32 inches wide containing 108 square feet, together with nails and cement.

PRICES.

1-ply complete, about 35 lbs., per square------$1 10
2-ply complete, about 45 lbs., per square------ 1 35
3-ply complete, about 55 lbs., per square------ 1 60

NUBIAN READY ROOFING.

Nubian Ready Roofing is made of Felt thoroughly saturated with tar and pitch.

Well suited for out-buildings, barns, construction buildings of all kinds, etc.

A Good Roofing.

Moderate Prices.

Put up in rolls 40½ feet in length, 32 inches wide, containing 100 square feet.

This roofing is Water, Fume and Acid proof.

Nails and Cement are not included.

Will last for years when coated, every two or three years, with tar coating.

The weight of each roll indicates quality.

	Weight Per Roll.	Price Per Roll
3-ply	60 lbs.	$0 75

OILS.

BARREL PRICES.

The prices quoted herein on Oils are for same in original barrels of about 50 gallons. When ordered in small packages, the following advances will be charged over the barrel price, with no extra charge for cans:

	Per Gallon Advance.
In ½ barrels (about 30 gals.)	*$0 05*
In 10-gallon shipping cans	*08*
In 5-gallon shipping cans	*10*
In 3-gallon shipping cans	*12*
In 2-gallon shipping cans	*15*
In 1-gallon shipping cans	*18*

Where buyers furnish their own cans, Oils will be sold at 2 cents per gallon advance over barrel price.

BURNING OILS (P.-G. Co.'s Special Brands).

	Per Gal.
Prime White IXL, 150° test	$0 09½
Radiant Water White, extra quality, 150° test	10
Star Head Light, water white, 175° test	12
Mineral Burning Oil, 300° test	15
Crude Petroleum	10

NAPHTHAS.

	Per Gallon. Iron Bbls.	Wood Bbls.
Benzine, for painters' and printers' use	$0 12	$0 14½
Gasoline (Deod.), for stoves, gas engines, automobiles, motor boats, cleaning, etc	11½	------
Gas Machine Gasoline	25	------

Iron barrels charged extra at $8.00, and returnable at same price, if freight charges are prepaid.

Gasoline or Benzine can only be shipped in cans or iron barrels. The railroads will not accept wooden barrels.

MINERS' OILS, ETC.

	Per Gal.
Kentucky Test Miners' Oil	$0 52
P.-G. Co. Miners' Oil	54
Signal, Extra (for lanterns)	55
Signal, No. 1 (for lanterns)	45

LARD OILS.

Extra Winter Strained Very light color, made from pure lard.	$0 74
Extra No. 1 Winter Strained A light amber color, made from off-colored lard.	66
No. 1 Lard Oil Amber color, made from light grease.	57
No. 2 Lard Oil Dark amber color, made from dark grease.	55

OILS.

Barrel prices, see page 99 for advance in smaller lots.

BLACK LUBRICATING OILS.

	Per Gal.
Residuum A heavy black oil, suitable for heavy machinery.	$0 10
Heavy Car Oil A very heavy oil, for summer use for cars, trucks, and heavy machinery.	11
XXX, 25 degrees cold test A good reliable black oil for summer use.	12
No. 1 Natural, 15 degrees cold test An excellent black oil for general use in moderately cold weather.	13
T. K. Natural, Winter cold test One of the best and most reliable black oils for winter use—good body and free from grit.	14
Arctic, Zero cold test For extreme cold weather this oil is recommended, a good lubricator.	15
West Virginia, "Zero" cold test, Nat., 29° Grav. The best black oil produced, made from strictly natural West Virginia Crude.	19

ENGINE AND MACHINERY OILS.

28-Degree Paraffine Oil This oil is a light paraffine product, golden color, and is adapted for use on loom spindles in cotton spinning mills and as a general spindle oil, including very light machinery. It is also used for blending and compounding purposes, such as thread cutting, etc.	13
26-Degree Paraffine Oil This is a 26-gravity golden paraffine oil, and is adapted for use on journal lubrication, including engines, dynamos, and shafting.	14
25-Degree Paraffine Oil This is a heavy-bodied pale paraffine product. It is sold under the brand of Paraffine Oil, but is extensively used for engine oil purposes, especially where heavied-bodied pale oil is desired.	15½
Golden Machinery A light amber oil for light-running machinery.	17
No. 1 Golden Machinery Similar in appearance to Golden Machinery, but heavier body, suitable for general use, especially on high speed machinery with closely adjusted bearings, including engines and dynamos. Filters freely.	18
Extra Golden Machinery A light amber oil, 25-gravity, good heavy body. An excellent oil for general use.	24

OILS.

Barrel prices, see page 99 for advance in smaller lots.

ENGINE AND MACHINERY OILS—Cont'd.

	Per Gal.
Garnet Engine Oil This is a bright red, light body engine oil, adapted especially for use on dynamos, high speed engines, and for the lubrication of all high speed closely adjusted bearings; is very penetrating and reaches all points of the bearings, lubricating them and eliminating friction. Also a suitable oil for harvesting machinery.	$0 18
Peerless Engine Oil This is a pale oil adapted especially for lubricating high speed engines, dynamos, and all high speed machinery having closely adjusted bearings; very quick acting oil, and will filter freely, permitting its use over and over again.	19
Euclid Engine Oil A pale colored oil of good quality, adapted for high speed machinery where an oil is desired that will not feed too fast, and at the same time is quick acting on the spindles and bearings.	22
No. 10 Gas Engine A heavy red gas engine oil of high fire test and viscosity, especially prepared for stationary gas engines. This is a high grade gas engine oil, which does not materially change consistency under heat. Free from impurities. Will not gum or carbonize, leaving the mechanical parts clean. Warranted to give satisfaction.	30
No. 1 Yellow Castorine This is a heavy stringy oil, largely used in saw-mills and places where dust prevails. On account of its stringy nature feeds very slowly, and is a very economical oil, especially adapted for harvesting machinery.	19
Alaska Ice Machine Oil A light colored oil with a cold test of zero. Adapted especially for lubrication of ammonia compressors.	24
No. 1 Dynamo Oil A light oil suitable for high speed engines, dynamos, and motors. Filters readily and can be used over again. This oil is also adapted for lubricating power cream separators.	22
Extra Dynamo Oil This is the very best quality lubricating oil for high speed engines and dynamos, and all other high speed machinery. It acts very quickly and filters quickly, and can be used over and over again.	27
Sewing Machine Oil A very light oil, especially adapted for use on sewing machines and all light lubrication, including spindles, hand cream separators. It is stainless and non-gumming, making it especially desirable for cotton mill and other high speed spindles requiring an oil of this character.	42

OILS.

Barrel prices, see page 99 for advance in smaller lots.

ENGINE AND MACHINERY OILS—Cont'd.

Per Gal.

Sperm Oil (Pure Winter Bleached)..... $1 00
This, as its name indicates, is a strictly pure sperm oil, formerly used largely for sewing machines and now quite largely for use in connection with mineral oils to improve their quality.

No. 1 Screw Cutting Oil..... 52
This is a combination of lard oil and mineral oil, made especially for all kinds of thread and screw cutting, and is preferred by most users to pure lard oil.

No. 2 Screw Cutting Oil..... 47
Similar to No. 1, only containing a smaller proportion of lard oil, and is intended for lighter work.

CYLINDER OILS.

Diadem..... 30
This is a dark red cylinder oil compound, and is used as a general purpose lubricant for all classes of steam engines, pumps, and other machinery operating under moderate steam pressures; feeds freely and uniformly, and works very satisfactorily with saturated steam at the cylinder.

Corliss..... 40
This is a highly filtered oil, made from Tiona Filtered Stock, compounded especially for high grade steam lubrication, of good fire test and viscosity, and a thorough feeder. Will not stain the feed glasses. Recommended for general high grade work where steam pressure does not exceed 100 to 125 pounds.

Virgin..... 60
This represents the very finest grade of cylinder oil, refined from pure Tiona Crude and filtered to the highest point to eliminate all impurities and non-essentials of lubrication; is of good fire test and viscosity, and adapted for the very finest steam engine lubrication, and is especially adapted for engines having complex valve motion. It has a very low cold test, insuring uniform and free feeding properties.

700 Cylinder..... 65
A dark, heavy oil of good body, very high fire test and viscosity, and represents the best grade of dark cylinder oil on the market. It is compounded and especially adapted for high pressure service where steam pressures range above 100 pounds, and will work either through a sight feed or mechanical force feed system. It is absolutely clean, always uniform, and is non-corrosive. Not adapted for use on low pressure engines.

Valvone Cylinder..... 70
The highest grade and best cylinder oil made of any kind, splendid body, high fire test and viscosity. Safe oil to use on the highest grade machinery.

OILS.

Barrel prices, see page 99 for advance in smaller lots.

AUTOMOBILE OILS.

	Per Gal.
"A" Auto Oil, medium	$0 45
This is a medium heavy oil for cars requiring this body, or for motors running at high speed with worn pistons. For an oil of this character it shows less carbon in the cylinder than the usual medium body or heavy oils, and is more economical in use than most of the light oils.	
Pee-Gee Auto Oil, light	50
The highest grade light automobile oil on the market, lemon color, guaranteed to be strictly non-carbonate. All impurities removed by filtration. High fire test and good viscosity, and does not materially change consistency under heat, insuring proper lubrication without carbon, suited for almost any gasoline motor on the market. Flows freely, acts quickly, and will not readily congeal.	

MISCELLANEOUS OILS.

No. 1 Neatsfoot Oil	62
Extra Neatsfoot Oil	72
Fish Oil, blended	38
No. 1 Black Harness Oil	30
O. K. Black Harness Oil	50
Pure Olive Oil (for technical use)	1 75

White Bloomless Neutral Oil	16
White Star Neutral (Bloomless) Oil	18
Crude Creosote Oil	25
Rubbing Oil (for furniture)	20
Benzole, Refined	60

BEST CASTOR OIL (for Medicinal Uses.)

Quotations are per gallon of 8 pounds.

In barrels, about 50 gallons (package free)	80
In half-barrels, about 30 gallons (package free)	82
In cases of 2-5 gallon sealed cans (package free)	84
In cases of 1-5 gallon cans (package free)	86
In cases of 10-1 gallon cans (package free)	96

No. 3 LUBRICATING CASTOR OIL.

A pure castor oil, dark in color, suitable only for lubricating purposes.

Barrels	78
Half-barrels	80

COMMERCIAL CASTOR.

In barrels	65
For lubricating purposes only. It is a purely vegetable product, of the same consistency as castor oil, used extensively with best results as a lubricant for buggies, carriages, etc.	

OILS.

Barrel Prices, see page 99 for advance in smaller lots.

COTTONSEED OILS.

Prices on Cottonseed Oil are per gallon of 7½ pounds.

	Per Gal.
Refined Cooking Oil	$0 62
Peerless Pastry Oil	64
Druggists' Cottonseed Oil for Liniments	75

AROMATIC FLOOR OIL.

A light cherry-colored oil with fragrant odor, used for applying to floors of stores, office buildings, etc., to prevent the flying of dust.

In barrels	25
In half-barrels	30
In 10-gallon cans	33
In 5-gallon cans	35

PAINTERS' OILS.

Linseed Oil, raw, pure, old process	57
Linseed Oil, boiled, genuine kettle boiled	58

In 5-barrel lots one cent per gallon less. We sell 7½ pounds weight as constituting a gallon of linseed oil.

Fresh Linseed Oil, medicinal	62
Calcutta Paint Oil	40

A substitute for linseed oil, suitable only for the cheapest class of work, such as barns and fences. Not recommended for high grade work.

Master Painters' Linoleate Liquid	50

A high class linseed oil substitute, being itself a linseed oil extension. It is made by reducing linseed oil by heat to the consistency of a jelly and thinning again with mineral spirits. It takes the place of linseed oil, and is recommended especially for factory work, such as cars, etc.

Turpentine, Pure Spirits ..... Market

We ship Turpentine from Louisville at an advance over ruling Savannah price, day order is received, of 6 cents per gallon.

Ternapyne	30

An excellent substitute for turpentine for painters' use only (not suitable for medicinal use).

Ternapyne is a blend of new process turpentine with mineral spirits. Has a similar odor and appearance to Pure Spirits of Turpentine and is about the same specific gravity.

AXLE GREASE.

HUB AXLE GREASE—A high quality grease for wagons.

PETROLATUM.

Petroleum Jelly for Druggists' Use.

Lacquered Tin Cans.

Guaranteed under Pure Food and Drug Act.

Extra Light Amber.

Our Petrolatum in barrels is not stamped, but is sent out under a caution notice stating it is "removed from the Refinery unstamped as an unfinished product, to be repacked, stamped, and otherwise placed in a salable condition."

Our Petrolatum in cans is stamped by us under the War Tax Law with revenue stamps on a basis of the prices specified below. When resold by purchaser he must add additional stamps at the rate of ½-cent for each 5 cents of value.

CHEROKEE RED ROSE POMADE—Highly Perfumed.

2-oz. bottles, 1-doz. cartons, per dozen	$0 45
2-oz. bottles, 1-doz. cartons, per gross	4 65

In gross lots dealer's name printed on label without extra charge.

Cherokee Red Rose Pomade bears a War Stamp on the basis of a 10-cent retail article.

PETROLINE.

(Petroleum Jelly)—Small.

Under the War Tax Law to increase the internal revenue, approved October 22, 1914, our Plain and Perfumed Petroline in bottles is stamped at the rate of ½-cent for each 5 cents of retail price. On this basis the different sizes quoted below are stamped as follows:

1½ and 2-oz., to retail at 5 cts. bears stamps ½ ct.
4 -oz------ to retail at 10 cts. bears stamps ¼ ct.
6 -oz------ to retail at 15 cts. bears stamps ⅜ ct.
10 -oz------ to retail at 25 cts. bears stamps ⅝ ct.

If the retailer desires to retail at a higher price than those specified above, it will be necessary for him to add ½-cent stamp for each 5 cents added to the retail price, or we can add the additional stamps for him, if he so instructs, charging him with the additional cost of the stamps.

LINSEED OIL SOAPS.

"BUCKEYE CLEANSER."
The Soap that Cleans and Polishes.

A strictly pure vegetable oil soap, made expressly for washing painted and polished surfaces. Good for use on

Autos	**Walls**	**Carpets**
Vehicles	**Furniture**	**Tiling**
Floors	**Leather**	**Pianos, etc.**

Contains no free alkali. Cleans quickly and thoroughly and as harmless as clear water. Excellent for household use—on floors, walls, furniture—for cleaning carpets and rugs, etc. It cleans, polishes and restores lustre to polished surfaces—an ideal soap for washing woolens, silks, laces, and delicate fabrics.

For Building Use.

Building managers find "BUCKEYE CLEANSER" the best, safest, and most economical soap for general cleaning purposes. It cleans things clean. Gives the floors a lustre. No alkali to discolor the tiling. No gritty material to fill up the cracks. Used by

Buildings	**Railroads**	**Boats**
Hotels	**Stores**	**Street Railways**
Institutions	**Schools**	**Factories**
Hospitals	**Fire Departments, etc.**

In ordering state whether New or Old Style Breasts or Nipples are wanted; in absence of instructions new style will be sent.

Illustrated Catalogue of Bottles Mailed Free on Application.

DRUGGISTS' FLINT BOTTLES.

On bottles of every kind, shape, or description, where a particular height is wanted, the height must be specified. Where an identical shape is wanted, sample must be submitted. Where bottles are wanted to fit cartons or any special receptacle the order should so state, and both sample of bottle and carton be submitted.

The reason is that the names of bottles only indicate the general shape and bottles made by different factories vary in slight details. Therefore, where an identical shape or particular style is wanted, attention should be called to this in ordering.

STONE'S PAPER JULEP STRAWS.

These straws are made of Manila Paper coated with hard white Paraffine Wax of high melting point. They are free from taste or odor, and are not affected by anything used as a drink. They are larger than natural straws and one straw will always suffice. They can never be used but once, as they will show the marks of use. Stone's paper straws are never "musty," and every one is sweet, clean, and perfect. Packed 500 straws in carton.

TOILET PAPER.

These are large solid rolls. Will dissolve readily in water and not clog pipes.

Special attention is called to the Tokyo and Formosa Brands put up 200 to the case, as these are most economical packages.

Where **extra fine quality** is desired we recommend our **Lily White Crepe.** Many bath rooms are furnished in pure white, and in these cases this paper will harmonize with the decorations.

Extra Bulbs	"	.18

PEE-GEE Hand Lamps with large reflector, throws spotlight; just the thing for coon and possum hunting.

	PRICE	
Without Battery	Each	$ .80
With Battery	"	1.05
Extra Bulbs	"	.21

CHEMICAL FIRE EXTINGUISHERS.

Hand Chemical Extinguisher Tested Under Supervision of Underwr.ters' Laboratories, Inc.

The use of one or two of these Extinguishers about your store may reduce your insurance rate, and will certainly afford you great protection against fire.

Capacity of Extinguisher about three gallons.

It throws a stream a distance of about fifty feet, carrying a large amount of carbonic acid gas, which excludes the oxygen and prevents combustion.

A fire can not live if a small per cent of carbonic acid gas is in the air.

It is forty times as efficient as water and will extinguish fires of oil, naphtha, gasoline, etc., which water only spreads.

Price, complete with one charge, $7.50 each.

Packed in shipping order.

WINDOW GLASS.

RETAIL PRICES PER LIGHT.

The following list shows retail selling prices of window glass (In "A" quality) by the single light, calculated at the different discounts at the top of each column.

"B" quality is usually retailed by the light at same price as "A."

Your COST will, of course, vary with the changing window glass market, and you can determine from time to time, based on these changing costs, what retail discount it is advisable for you to use.

In determining your selling price you must, of course, take into consideration the cost of freight with a reasonable allowance for breakage.
